## OVERVIEW

The "CityProvinceDropdown" feature in Magento 2, it might be related to customizing the checkout or address fields to include a dropdown menu for selecting cities. This can be useful for improving the user experience and ensuring accurate address information. And also visible on shipping address and billing address when user select country then visible all the states related to selected country and related to selected states then visible all the city which is select states

# How does the Extension work ?

First, we must access the admin panel and navigate to **Bluethinkinc >City**
**and click the Add New city. And add new city then goto fronend and land click on add to product button and then click on proceed to checkout then you can see when you selected country then related to this country all the states are visible and in which states you added city select this states then you can see cityDropdown is visible on.**
**And when login customer is loggedIn and click on Addredd book tab and click on Default billing address you can see your cityDropdown.**
